Reasons for Allowance

1. Claims 1-32, 34 and 36 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited art taken alone or in combination fails to teach the claims invention of solving a Model Predictive Control problem to control a plant represented by a Large Sparse Matrix Equation (LSME). Solving the matrix equations (LSME) involves forming a square root of a H (H_r), forming a square root of a Large Sparse Matrix of LSME (LSM_{root}) using H_r in a plurality of iterations of a quadratic programming solver and completing the solution of the LSME based upon (LSM_{root}).

The closest prior art (Das, USPN 7,152,023; Das USPubN 2004/0162709; Braatz et al, USPN 6,064,809; Tenny et al, Non-linear Model Predictive Control via Feasibility-Perturbed Sequential Quadratic Programming; Rao et al, Application of Interior-Point Methods to Model Predictive Control) address both Interior Point Methods and Active Set Methods as algorithms in solving the Model Predictive Control quadric programming problem represented by LSME. However, such prior art does not solve the matrix equations (LSME) by forming a square root of a H (H_r), forming a square root of a Large Sparse Matrix of LSME (LSM_{root}) using H_r in a plurality of iterations of a quadratic programming solver and completing the solution of the LSME based upon (LSM_{root}).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
